

## Innovative Smart Farming services supporting Circular Economy in Agriculture

\*two pilots in the same area

### Remote

Collects remote, processes and exploits information for every part of the parcel.

### Field

Offers valuable information by recording, analyzing and interpreting atmospheric and soil data at specific points within the fields every time it passes, uninterruptedly.

### Eye

Allows information to be recorded by agricultural consultants and producers in the field.

### Farm

Records the actions that the producer takes in his field and crop.
